

February 25, 2010

Mike Cosgrove, New Mexico State Director of Crown Ministries, continued our financial series talking about how to set up a budget. To start, write down all income for each month, then subtract your tithing and taxes for each month. That will be your Net Spend able Income for the month. Then, write down every penny you spend every day for the next 30-60 days. This will show you what you spend your money on each month. From there, you can make a budget. You can learn more about setting up budgets, go to their website www.crown.org or call the Albuquerque office at 505-314-3472.
